

## Reusche Colors

### Decorator's Choice with Cadmium Option

**Profile:**

Glass enamels, exhibiting high gloss

**Firing Temperature:**

1120-1180°F (600-640C) Firing cycles are dependent on the type of thickness of the glass, type of lehr and belt speed.

**Mixibility:**

All colors within the range are fully intermixable with the exception of cadmium bearing colors. However, we recommend running pre-production tests to verify color stability.

**Application:**

Supplied as powder or pastes for screen printing, either hot or cold, and spraying.

**Health & Safety:**

For detailed Health and Safety requirements consult the appropriate Material Safety Data Sheets.

	Formulated without lead or cadmium (unless otherwise stated) using a zinc borosilicate frit. No lead was intentionally added to these colors.
	For use on cosmetic bottles, ad specialty items and non-returnable bottles
